DFENDER WHEAT SEED TREATMENT

DFender seed treatment is the high-quality seed treatment of DF Seeds. We provide the best combination of seedling protection that Michigan farmers need on their wheat. DFender wheat seed treatment will include the fungicides and insecticides that are needed in Michigan.

DF Seeds believes all wheat should be managed for the greatest yield potential possible!

ORGANIC wheat growers may order untreated wheat in any of our varieties. We will reserve your untreated wheat if ordered by August 1st.
